

Powerpette® Plus, Pipette Controller

The Powerpette® Plus offers a unique combination of features to give you precision fingertip control in a classic streamlined design, suitable for users with large or small hands. The pipette holder is designed at an angle ideal for use within a laminar flow or biological safety cabinet.

Powerpette® Plus comes in a choice of six colours: blue-green, mint, mauve, pink, yellow and classic grey. Powerpettes can be colour-coded—for user, for application or for location.

- 3 aspirate & dispense modes. High and low settings both have variable speed. Gravity dispense mode is designed for use with 'To Deliver' (TD) pipettes
- In any mode-setting the speed of suction and dispensing is controlled through the concave finger triggers, designed to provide a comfortable and positive grip and to require the minimum of effort
- A fully-charged Powerpette® has approximately 8 hours of continuous use available; a 'low battery' light illuminates when one hour's power remains
- Powerpettes® are supplied with 0.45µm and 0.2µm hydrophobic filters, as standard, for effective protection against airborne contamination of the unit during aspiration, and of your samples during dispensing
- Environmentally friendly nickel metal hydride battery
- Suitable for all types of pipettes 1–100ml
- CE Marked
- 1 Year Warranty

Specifications

Batteries	2x1.2V nickel metal hydride
Battery service life	8 hours continuous use
Charger	75mA/h for 14 hours
Overall weight, g	180 g without stand/wall bracket
Filter, µm	Hydrophobic 0.45 or 0.2
Case material	ASA
Nosecone material	Polypropylene
Pipette holder	Silicone
Pipette types, ml	Plastic or Glass 1–100

Powerpette® Plus with UK charger*
